OPERATIVE REPORT

TWI  
RM: 1602 C  
DIS:  
AUTH ID: TW6323

DATE OF OPERATION: 05/07/2007

PREOPERATIVE DIAGNOSIS:

1. Left knee meniscus tear.
2. Osteochondritis desiccans involving medial femoral condyle.
3. Chondrosis.

POSTOPERATIVE DIAGNOSIS:

1. Left knee medial meniscus tear.
2. Patellofemoral chondrosis.
3. Osteochondritis desiccans involving the medial femoral condyle.

PROCEDURES PERFORMED:

1. Left knee arthroscopy with medial meniscectomy.
2. Patellofemoral chondroplasty.

SURGEON: Mark Kowall, MD

ASSISTANT: None.

ANESTHESIA: General.

ANESTHESIOLOGIST: Harry Wiese, MD

TOURNIQUET TIME: 30 minutes.

COMPLICATIONS: None.

INDICATIONS: This is a 50-year-old male, inmate at California Men's Colony who presents with a 10-month history of left knee pain. August 2006, he collapsed under a lawn chair onto the left knee. He has since noticed the persistence of pain.

OPERATIVE REPORT

TWI

RM: 1602 C

DIS:

AUTH ID: TW6323

Radiographs obtained last August demonstrate a "abnormality" in the medial femoral condyle suggestive of osteochondritis desiccans. MRI performed November 2006 consistent with a complex tear medial meniscus.

Seen by myself initially for consultation on 03/23/2007. Pain focus of the anterior aspect and medial compartment. Options were presented. He has elected to pursue operative intervention. The various operative treatment discussed at length. Risks and complications outlined.

#### OPERATIVE FINDINGS:

1. Exam under anesthesia. Patella exam demonstrates a neutral tilt with 2+ glides. Ligament exam unremarkable.
1. Arthroscopic findings: The suprapatellar pouch, medial/lateral gutters unremarkable. The undersurface of the patella demonstrated generalized grade 2 chondrosis. The femoral trochlea demonstrated minimal chondrosis. The patella centered appropriately at 45 degrees of knee flexion. The intercondylar notch demonstrated normal-appearing anterior cruciate ligament and posterior cruciate ligament. The lateral compartment demonstrated slight chondrosis with no lateral meniscus tear. The medial compartment demonstrated a large posterior horn medial meniscus tear, consistent with the MRI findings.

The area of the potential osteochondritis desiccans as noted by x-ray and MRI, showed a healed over defect. No exposed bone. Stable cartilaginous cap.

PROCEDURE: Brought to the operating room, general anesthesia was administered. Preoperative antibiotics given.

Exam under anesthesia performed with the above-mentioned findings.

360599 MARK KOWALL, M.D.

OPERATIVE REPORT

TWI

RM: 1602 C

DIS:

AUTH ID: TW6323

Tourniquet placed high in the left knee.

The Accufix leg holder could not be utilized secondary to thigh girth. A lateral post was utilized. A gel roll was placed underneath the posterior thigh to prevent hyperextension of the hip joint. The right lower extremity was suspended in a flexed abducted position from a well-padded leg holder. The left knee and lower extremity were then shaved, prepped and draped in the usual sterile fashion. The leg was exsanguinated and the tourniquet was inflated to 325 mmHg.

Standard anteromedial, anterolateral portals were established. A standard superior lateral outflow was established. A 30 degrees arthroscope was inserted into the knee and a thorough diagnostic evaluation was performed with the above-mentioned findings.

With the use of the 4.5-mm curved Synovator, the undersurface of the patella was debrided, unstable areas of hyaline cartilage were debrided.

Attention was then directed towards the medial compartment. The medial meniscus tear was as stated.

With the use of a low profile duckling basket, upbiting basket and 4.5-mm curved Synovator, a partial medial meniscectomy was performed. A stable rim of meniscus was left.

Next, the medial femoral condyle was carefully inspected, the area of the defect noted by MRI was evaluated. This did demonstrate a cartilaginous cap, there were no unstable characteristics. No OATS procedure or microfracture procedure performed.

Cartilaginous loose debris was lavaged out the knee. Portal sites were closed with catgut. Marcaine with epinephrine injected into the knee for postoperative anesthesia. Bulky

OPERATIVE REPORT

dressing was applied followed by TED hose. The patient was extubated, brought to recovery in stable condition having tolerated the procedure very well.

DISCHARGE INSTRUCTIONS: In 48 hours, the dressing should be changed, Band-Aids reapplied. The patient should keep the area clean, dry and covered for 7 days. He should not get it wet for 7 days. Crutches for comfort purposes only, weightbearing as tolerated. He was given a series of independent exercises for range of motion and strengthening.

Follow-up in the Twin Cities clinic with me in 4-6 weeks.

4/24/07		C-file review - RSDRC 4-4-05 SCC 7-8-05; arrived CMC 1-12-07 EPRD 12-30-14. 4 yr + 8 yr = 12 yr term: Assault w/ firearm. 2 strikes (9-12-04)
		Juv. Hx from 1976 - box 115 10-22-06 Desobeying Order
		Appears from Crim investigation write up that this sentence was for threatening a neighbor w/ a shotgun - reads like off-the-wall even until you read IM's description which makes <sup>more</sup> sense - however trial was by jury so v. concerned 12 others re their version.
		Choros indicate some history of med holding by checking '05 + '06
		TABE SCC 4.5 leading } 7-13-05 3rd overall }
		SCC 6.2 L } 8-17-06 5.4 overall }
12-05 to 11-06		Prior school placement Choros = + proper

4/19/07		IM/PT seen briefly in IDTT re school issue. Assigned CM has not yet evaluated IM/PT or reviewed UHR or Cfile. Appointment will be scheduled during coming week and IM/PT's academic status assessed. May be returned to IDN for action if this is needed. <i>Dr. J. J. J. J. J.</i>
4/24/07	10:40-11:00	IM/PT seen 2° to academic issue. C-file reviewed as well as UHR. IM/PT insists he shouldn't be in school - "50 yrs old", "never good at school", "need to move", "won't do anything for me or street." IM/PT suggests this assignment is "toxic" for him & describes some anxiety symptoms - sweating, not liking it because people too close, however, primarily seems he just doesn't want to be in school & rejects offers to assist his adjustment w/ TX 1:1, group, meds. Appears <i>Dr. J. J. J. J. J.</i>

3/30/67 - Improved: Mr. Hollister, though he seems to understand my feedback that there seemed no clear psych indicators to remove him, currently keep current appointment. (weight: 276 - increased, LOS 11/30 - sexual in manner P's comment with old Hsp C).

By JMD

4/16/7 1935 - Psychiatry follow-up/patient request (3/24)  
 S/O: He looks like increased Boredom, before  
 more anxious which interferes with sleep  
 today. He does well, helped. Well-being  
 him doing, more motivation e.g. walks, writes letters,  
 call family. A.H., previous? occasionally, has now  
 called (untrained), can ignore. He is H.C. sleep,  
 appropriate, 'in patient position' work to lose  
 weight. Plans to jump rope twice a day. LOS (1/30)  
 into low energy depression (Hsp C). weight: 276  
 recently formed. relevant information. Good eye  
 contact. Good and compliance on MARE  
 re. recurrent MDD with psychotic features, stable  
 PTSD. Hsp C. asthma over 20 years (continued)

3/30/07	10:20	<p>Psychiatry Drop in:</p> <p>S/O. Stan Mr. Haddleson. 'He said he was going to call me in, but he didn't, so I waited on him today.' Associates to problems with school - poor attention span (commotion about unable to contact family, appeared, left some papers). Before in school was noisy in kitchen, 'a stress relief.' 'I'm so, I'm not getting a degree soon. I've got 2 years to go.' 'I don't want to be in the hole.' Problem with med line MTA last weekend, told 'I'll give them to you when I get liberty' and did not get am/pm med. I didn't refuse them. 'He had my emotions running high. He still called in the office.' MTA said patient was talking in that line. Got 'hot' mood when 'pushed med window' children home, walked off, no confrontation. He has avoided that MTA, and still getting med. always med well. no ST, HT, psychotic content, clear thoughts. Moderate grooming. no evidence of mood lability.</p> <p>R: Appear at doctor's appointment, morning, has said some contact issue for now. Hope P: He will mirror some &amp; improve further notes (continued)</p>
